## Workday Hire Business Process Overview

The Student Hiring Process is composed of a 3 step process, with sub-processes in each. All 3 of the categories **must** be met for compliance purposes.

1. **Recruitment** – Completed outside of Workday through **Hirealio**. These are separate systems and they do not communicate with each other. You will create a job posting in Hirealio and ensure a position is available to fill in Workday.
2. **Hire Business Process** – New student hires are initiated by **Human Resources** and is composed of the following steps before onboarding can trigger.

**\*\* NOTE:** Add jobs and transfers will be initiated by the departments; therefore the process will vary accordingly.

3. **Onboarding** – This is a 5 step sub-process to be completed by the **Employee, Department HR Contact, Human Resources.**
  - a. The **Employee** will receive 2 initial onboarding tasks to enter personal and contact information.
  - b. Once completed it will route to the **Department HR Contact** one last time to trigger the rest of the onboarding. The task will be titled:
    - i. **“To Do: Trigger Benefits Onboarding Questions, Direct Deposit, Privacy Flag, and State Veteran's Preference for employee”**
  - c. Once this task is completed approximately 12 additional tasks will trigger to the **Employee**. The **Employee** must complete all of these tasks and most importantly the federally required **Section 1 of the Form I-9 on or before their designated start date.**
  - d. Once Section 1 has been completed, an I-9 Partner in HR will send a notification to the Employee and prompt them to visit HR. The notice will provide specific instructions for completion **Section 2 of the Form I-9 and the final hiring packet.**
  - e. Once onboarding has been completed, an HR Partner will send an **HR Hire/Onboarding Completion Notice** to the Direct Supervisor and Departmental Admin (HR Contact) with status of employee (eligible or not eligible to being working).
